Hiring Team, Bik.ai

Manifest AI runs North America growth for 150+ D2C brands over WhatsApp, and D2C is the one vertical I have worked on both sides of the funnel. At Pixis I ran 8 D2C accounts with the client budget in one hand and the P&L target in the other, and at GenY Medium I got a 16x ROAS out of D2C catalog feeds by rebuilding the Merchant Center and Meta feeds myself. A Founder's Office Growth seat needs someone who already knows what a D2C brand's growth problem looks like from the inside, not someone learning the vertical on the job.

The rest of the role is business operations and GTM execution, and I run that job on my own company right now. PriceKeel is the B2B SaaS product I founded: I built the guardrail engine, set up the CRM and pipeline reviews, sell into RevOps, Sales leadership and Finance, and I am running pilots and raising the first round as the sole operator. I carry that same instinct inside a much larger company too. At Applied Materials I turn scattered input from Sales, Engineering and Accounts into one market view leadership can act on, and I run the OKR cadence behind weekly and quarterly business reviews so cross-functional teams stay pointed at the same number. At Sensata I owned end-to-end GTM for new sensing products across North America and Europe, positioning through launch, and it generated \$2M+ in first-year revenue. Both jobs required getting people outside my own function to move on work I had done, which is the actual test of a Founder's Office seat.

I have also hired and managed teams end to end, from the 8-person account team at Pixis to the team behind my own SwipeHire product, so the hiring and team-building side of this role is not new ground. And I already run Claude agents to automate the repetitive research and reporting in my day job, the kind of leverage a fast-scaling AI-native company needs from whoever is running the CEO's agenda.
