Hiring Team, Teledyne LeCroy Protocol Solutions Group

Your posting asks this Marketing Manager to be the main link between Product Management, Sales, regional marketing and external partners, not just run campaigns in a vacuum. I have run that exact handoff: at Sensata I owned end-to-end GTM for new sensing hardware launches across North America and Europe, positioning, pricing, channel and the launch itself, working as the connective tissue between Product Management and Sales while driving $2M+ in first-year revenue through OEM and distributor accounts.

The rest of the role reads like work I already do. I built the sales enablement decks and case studies that got 50+ reps to actually use them, lifting win rates 30%, and ran ongoing competitive analysis across EMEA and the US so regional teams always knew where the next launch needed to land. On the analytics side, I instrumented KPI frameworks in SQL and GA4 across 50K+ connected industrial devices, the kind of marketing-analytics discipline that keeps a global demand-generation funnel honest instead of guessed at.

I am now Strategic Marketing III at Applied Materials, sizing the semiconductor market with Sales and Engineering and building the forecasting models that keep pricing and demand plans ahead of field reality, close to the technology and test-and-measurement domain Protocol Solutions Group sells into. I have also started running AI agents built on Claude on the repetitive side of that market and competitive analysis, which is exactly the kind of leverage a one-person global marketing seat juggling NA, EMEA and APAC coordination needs.

That is the GTM-plus-analytics discipline I would bring to Protocol Solutions Group's launch calendar: turn product and compliance specs into positioning and enablement material Sales can use immediately, then keep the regional marketing and demand-gen engine reporting back on what is actually working.
