SUMMARY

Product-minded operator who ran **bid strategy and auction-level ROAS** for an 8-client AI adtech platform spanning Amazon Ads, Criteo and programmatic DSPs. A full-funnel rebuild of smart bidding and creative drove 3x ROAS in a month, and reading Amplitude signals across 30+ campaigns lifted ROAS 40% more broadly. At Sensata I owned the product roadmap and a 100+-feature backlog in Agile with engineering, grounding every call in SQL/GA4 cohort data and 30+ customer interviews. At Applied Materials I run AI agents built on Claude to automate repetitive analysis, the same LLM fluency ads-quality and ranking work calls for. On SwipeHire, my own zero-to-one product, I designed 8+ A/B tests that lifted activation 25%, the same experimentation velocity I'd bring to a complex ads quality domain.
