Hiring Team, Cisco

Your posting asks for someone who can run paid media hands-on and still manage external agency partners without losing lead quality in the handoff. At Pixis I did both at once: hired and managed an 8-person team directing paid media across 8 client accounts simultaneously ($15K to $90K a month each), briefing, validating and reallocating spend every week while still owning the campaigns myself.

The channel mix matches too. At Plug Power I ran Paid Search and Paid Social across Google Ads, Microsoft Ads, Meta and LinkedIn on $100K/month budgets, built the structured A/B test plan (15+ tests) that took CPA down 25% and lifted conversion 20%, then automated the WordPress and Pardot lead flow to cut cost per lead 50%, the kind of fix that keeps lead quality and volume consistent, not just one or the other.

Your note about AI-native channels and AI-driven workflows with human review is where I spend most of my current week. At Applied Materials I build forecasting and market-sizing models and automate the repetitive analysis behind them with AI agents built on Claude, keeping a human check on every output before it moves. Cisco's security portfolio is the kind of complex B2B sell I want my next campaigns sitting next to.
