Hiring Team, Ranqo

A founding Head of Growth role that combines CMO and CPO duties from day one is really asking for someone who has already run both the acquisition engine and the pricing and packaging decisions that determine unit economics. I run both today. I founded PriceKeel, where I set the commercial model, built the CRM, CPQ and deal-approval flow, and am running pilots and raising the company's first round, the exact zero-to-one ownership your first 90 days describe.

On the growth side, I owned $100K/month in paid acquisition budgets at Plug Power, cutting CPA 25% and cost per lead 50% through direct testing on landing pages and funnels, and delivered 16x ROAS for D2C brands at GenY Medium by rebuilding feed and catalog infrastructure. At Pixis I hired and managed an 8-person team across 8 clients, cut client churn 50%, and delivered 3x ROAS in a single month for one account through full-funnel restructuring, the same repeatable channel work your first 90 days call for.

Pricing is the half most growth candidates skip, and it is the half I built a company around. As Pricing Lead at Sensata I recovered $700K+ in margin in two quarters and raised distributor margins from 53% to 61%, and at PriceKeel I designed the guardrail engine that decides what a discount should actually be, backed by evidence Finance can audit. Selling to global buyers and closing in USD is also already how PriceKeel sells.

I would welcome the chance to talk through the first repeatable acquisition channel I would build for an AI-visibility product. More of this build-and-monetize work is at adhi-growth-ai.vercel.app/ref/ranqo.
