SUMMARY

Built the $627M pricing model Sensata's leadership acted on directly, the same quantitative rigor Notion's Business Operations team runs on. Partners daily with Engineering, Sales and Accounts at Applied Materials, turning ambiguous market questions into forecasting models multiple product groups build against, and automates that research with AI agents built on Claude. Led a 5-consultant team that structured Safran's market-entry question from 170 facilities down to a SAM of 28, the kind of business case built from nothing this role calls for. SQL, Power BI and Python back every recommendation; MS in Marketing Analytics, Simon Business School.
