Hiring Team, Assort Health

Your posting says you need someone who can drive qualified pipeline for SDRs through targeted campaigns, not just report on them. I already have the receipts: at Plug Power I automated the WordPress and Pardot lead flow end to end, tying SEM straight to MQL quality and stage 1 opportunities, and cut cost per lead 50% in the process.

I have run the full paid and email mix this role needs. I owned $100K/month budgets across Google, Microsoft, Meta and LinkedIn, cutting CPA 25% through bid optimization and 15+ A/B tests, and at Sensata I ran an email and paid launch program that generated +35% qualified leads. None of that stayed in a marketing silo: I built the sales enablement decks and case studies that went with it for 50+ reps, lifting win rates 30%, because pipeline work that does not reach the team closing on it is only half done.

Assort's demand engine has to turn a 285 million patient interaction dataset most competitors cannot touch into messaging a healthcare buyer trusts enough to take a call, and that is the kind of translation work I have done before: SEO partnerships that raised organic visibility 35% at Plug Power, and database and SEO audits at GenY Medium that grew the prospect base organically rather than renting it. I have also run these programs as one piece of a bigger engine, not a solo lane, partnering with sales, account and research teams at every company on this resume rather than owning demand end to end.

I would welcome 15 minutes to walk through how I would get a paid and account-based program moving for enterprise and mid-market health systems in the first 90 days. Proof trail at adhi-growth-ai.vercel.app/ref/assort-health.
