Hiring Team, Group O

Your posting asks for someone who can build the financial model behind an offer before it reaches execution, then hold up under questions from Finance, Sales and the strategy owner who pitched it. At Sensata I ran that process at scale: the Bleeders and Leakers Power BI system ranked 1,200 pricing opportunities against a $627M target, and the business case I built from what it surfaced recovered $700K+ in margin in two quarters while raising distributor margins from 53% to 61%.

That recovery held up because the underlying assumptions did. I shaped AP26 revenue models and multimillion-dollar customer quotes directly alongside senior executives, building forecasts on sound logic when the data was thin and defending them in the room, the same evaluate-across-products-and-segments work your business cases need before they clear a strategy owner's desk. Earlier at Sensata I ran 30+ customer interviews with OEMs and distributors to pressure-test willingness to pay before a price sheet ever reached the field, so the offer concept was already refined by the time it got expensive to be wrong.

I bring the same rigor to my own company right now. At PriceKeel I built a guardrail engine that scores discount exceptions against logic learned from a company's own closed-won and closed-lost deals, plus the audit trail that gives Finance evidence for every call. At Applied Materials I automate recurring pricing and forecasting analysis with Claude AI agents, the kind of tooling habit that turns a one-off model into something a team can run every cycle.

What I would bring to Group O's offer strategy work is someone who has already built the business-case discipline this role runs on, not just presented decks built by someone else, and who has closed a quantified margin gap inside a large, multi-segment business. I modeled three subscription pricing tiers from competitor benchmarks and willingness-to-pay research on my own product, SwipeHire, the same packaging logic that sits underneath acquisition, retention and SVOD offers. Proof trail at adhi-pricing-ai.vercel.app/ref/group-o.
