- Created a **guardrail engine** that reads live discount exceptions inside the deal platform and traces each one to its root cause, the price-discrepancy-to-system-fix loop this role runs across quote, order and invoice.
- Designed the **audit trail** that gives Finance an explainable, audit-ready record behind every pricing decision, selling the process to RevOps, Sales leadership and Finance against legacy CPQ and deal-desk tooling.

- Built the **FY2026 Bleeders and Leakers Power BI dashboard**: 1,200 pricing opportunities against a $627M target across 3 regions, 4 product families and 20 product lines, reporting win rate, stage distribution and $433M in margin gaps for leadership.
- Built a BU-wide **Power BI price-increase model** flagging line items where a price change could lift profitability more than 50%, the pricing-accuracy reporting this role maintains.
