Hiring Team, TikTok

Your posting asks for go-to-market strategy built around measurement solutions, not campaigns first and measurement second. I already ran that shape of work at Pixis, an AI ad platform, where I carried retail media (Amazon Ads, Criteo) and iOS app UA (Appsflyer, Adjust) for an 8-client, P&L-owning portfolio, and used Amplitude and Tableau to turn campaign-level behavior into the audience segments that lifted ROAS 40%. That is the same measurement-first instinct your Audience Measurement team needs: know what a signal means across channels before you build the pitch around it.

Cross-functional collaboration is the other half of this role, and it is how I have worked at every stop. At Sensata I ran 30+ customer interviews with OEMs and distributors, then turned technical features into messaging that lifted conversion 15% and built the enablement that raised win rates 30% for a 50-person sales team. At Plug Power I automated the Salesforce, Adobe Analytics and Google Tag Manager stack so paid spend tied back to lead quality instead of platform-reported clicks, the closed-loop discipline behind any measurement product a sales and marketing org actually trusts.

I test measurement claims rather than assume them. At Pixis I rebuilt a fashion brand's full funnel end to end, feed cleanup through lookalike expansion, for 3x ROAS in one month, and at Sensata I built KPI frameworks in SQL and GA4 across 50K+ connected devices to find the cohorts worth acting on before a dollar moved. I also automate the reporting side of that work with Claude AI agents at Applied Materials today, so I show up already treating measurement as infrastructure rather than a monthly deck someone has to chase.

What I would bring to TikTok's Audience Measurement team is a marketer who has already sold and built inside an AI ad platform, carried the retail-media and app-UA measurement stack that maps directly onto this role, and ties every GTM decision back to a number that survives scrutiny. Proof trail is at adhi-product-ai.vercel.app/ref/tiktok if you want the detail behind any of this.
