## EXPERIENCE

**Strategic Marketing III, Applied Materials** Jun 2026 - Present

- Runs **AI agents built on Claude** that act on forecasting and market analysis instead of just summarizing it, the reports-to-acts shift Snowflake's migrations engine is built around.
- Translates **deep technical input from Engineering** into one forecasting model across multiple product groups, the same weighing of engineering effort against customer value and feasibility a migrations roadmap needs.
- Carries **P&L and revenue targets** for the role, building the leadership decks and OKR cadence that keep cross-functional stakeholders aligned with no surprises.
- Shaped **competitive, value-based pricing** for a fast-growing market, forecasting its inflection points so the plan keeps pace with demand instead of lagging it.

**Product & Growth Marketing, Sensata Technologies** Sep 2024 - Jun 2025

- Owned the **product roadmap and a 100+ feature backlog** for new sensing products in Agile across 3 regions, accelerating releases 25% and cutting time-to-market 20%, the throughput discipline a team chasing one north-star metric has to apply feature by feature.
- Ran **30+ customer interviews** with OEMs and distributors before committing engineering time to a bet, turning pain points into fixes that lifted CSAT 22%, the validate-before-you-build habit an MVP-first roadmap depends on.
- Defined **KPI frameworks in SQL and GA4** across 50K+ connected industrial devices, isolating the usage signals that separated activated accounts from stalled ones and lifting feature adoption 18%.
- Drove **GTM for new sensing-product launches** across North America and Europe (positioning, pricing, channel), delivering $2M+ first-year revenue and the enablement collateral a feature needs before partners can sell it.
- Equipped **50+ reps** with sales enablement material (decks, case studies) they used unchanged in the field, lifting win rates 30%.

**Pricing Lead, Sensata Technologies** Jul 2025 - May 2026

- Modeled a BU-wide **price-increase scenario in Power BI**, flagging line items where a change could lift profitability 50%+, a data-first filter before a decision shipped.
- Drove **+12% YoY revenue** through price realignment benchmarked against 10+ competitors, partnering with senior executives on revenue models and multimillion-dollar quotes.
- Shipped the **Bleeders & Leakers dashboard** in Power BI: 1,200 pricing opportunities against a $627M target across 3 regions, surfacing $433M in margin gaps for leadership to prioritize, the same health-metrics tracking a migrations feature needs past ship date.

**Digital Marketing Manager, Plug Power** Oct 2022 - Jul 2023

- Led bid optimization and **15+ A/B tests** across Google, Microsoft, Meta and LinkedIn Ads, cutting CPA 25% through iterative, data-driven experimentation.
- Automated the **Mar-Tech stack** (Salesforce, Adobe Analytics, GA, Google Tag Manager) for closed-loop reporting instead of manual stitching.
- Reduced **wasted spend 15%** by owning keyword research and bid strategy across omni-channel campaigns, tying SEM to MQL quality.

**Customer Success Manager, Pixis (AI Platform)** Jul 2021 - Sep 2022

- Cut **client churn 50%** through proactive account strategy and vertical playbooks across an 8-client, $15K-$90K/month AI-platform portfolio.
- Fed **voice-of-customer insight to product** while carrying P&L targets for the account book, reporting findings directly to senior management.
- Used **Amplitude and Tableau** on user behavior across 30+ campaigns, lifting campaign ROAS 40%.

**Senior Digital Marketing Analyst, GenY Medium** Jan 2020 - Jun 2021

- Lifted a B2B e-commerce startup's **conversion rate 36%** and revenue 25% by auditing databases and rebuilding dashboards that exposed funnel gaps.
- Ran **database audits** that improved data accessibility 30%, serving as the main liaison between regional marketing managers, localization and analytics teams.

## PROJECTS

**SwipeHire**

- Shipped an **AI job-matching platform** (Python, OpenAI API, React) zero-to-one: wrote the PRD, scoped the MVP, built auto-tailored resume matching, and ran 8+ A/B tests and 12+ user interviews that lifted activation 25% across 50+ early users.

**NSE Paper-Trading Bot**

- Engineered a **Python-based data pipeline** (nsepython, yfinance) with rule-based technical scoring and an AI-enhanced reasoning layer on the Claude API for catalyst analysis, the same generative-AI-on-a-data-pipeline pattern a migrations engine applies to legacy systems.
