Hiring Team, ZynnexAI

I recovered $700K in margin in two quarters at Sensata by taking a pricing program from a raw data problem to a negotiated outcome with executives: the same move a Chief of Staff makes constantly, turning ambiguous input into a decision someone actually acts on. At ZynnexAI that instinct would run against the OKRs, leadership reviews and cross-functional handoffs between product, operations, sales and customer success that keep a voice AI platform for banks, lenders and insurers moving at the pace a BFSI buyer works at.

I also run my own company's founder's office end to end. PriceKeel is a decision-integrity layer for B2B SaaS deal pricing: I set up the CRM and pipeline reviews, segmented the buyer into RevOps, Sales leadership and Finance, and I am running pilots while raising the first round, with nobody else to hand pieces of the agenda to. That is the same discipline the role describes: owning follow-ups, streamlining decision-making, and keeping fundraising and partnership conversations moving alongside the day job.

At Applied Materials I partner across Sales, Engineering and Accounts to turn scattered field input into one market view leadership can act on, and I run the OKR cadence behind weekly and quarterly business reviews so cross-functional teams stay pointed at the same number. I already automate the repetitive research and reporting behind that cadence with AI agents built on Claude, the kind of leverage a fast-paced team building voice AI for banking and insurance workflows needs from whoever is running the CEO's time.

I have also hired and managed teams end to end, from an 8-person account team at Pixis carrying its own P&L to the team behind my own SwipeHire product, so the people and process side of a founder's office is not new ground either.
