Hiring Team, Talkdesk

Your posting for the Pricing Strategy Manager role is really asking for someone who can run a Pricing Committee: prepare proposals, document decisions, and cascade approved changes into SFDC/CPQ, the website and sales enablement without the pricing documentation drifting from the source of truth. I built exactly that discipline at PriceKeel, where I designed a guardrail engine and an audit trail Finance can review for every discount exception, and set up the CRM, CPQ and deal approval flow it runs against.

The analytics side is not new either. At Sensata I built the FY2026 Bleeders & Leakers Power BI dashboard, ranking 1,200 pricing opportunities against a $627M target across 3 regions, 4 product families and 20 product lines, and used the discounting analysis inside it to recover $700K+ in margin in two quarters and lift distributor margins from 53% to 61%. That is the same packaging-optimization and discounting work your req lists under Analytics and Research, just run on an industrial book of business instead of a SaaS one.

What I think fits this seat specifically is the combination of financial modeling and the ability to give a Product Manager direct, structured feedback without becoming a blocker. I partnered with senior executives on multimillion-dollar customer quotes and AP26 revenue models at Sensata, and I now build competitive, value-based pricing at Applied Materials while automating the recurring parts of that analysis with AI agents built on Claude, the same habit a Pricing Committee resource needs to keep documentation and dashboards current between committee cycles.

I would like to bring that pricing-governance discipline to Talkdesk's Pricing Committee. Proof trail at adhi-pricing-ai.vercel.app/ref/talkdesk.
