PITCH DECK | TALKDESK PRICING STRATEGY MANAGER

A Pricing Committee runs on documentation that cascades cleanly. I have already built the guardrail engine and the audit trail that make that happen.

Pricing governance, discounting analysis and packaging optimization, with the financial modeling to defend every number in committee.

- **$700K+** in margin recovered in 2 quarters via a discount governance program
- **53% to 61%** distributor margin lift through repricing
- **$627M** pricing opportunity dashboard, $433M in gaps surfaced
- **Guardrail engine + audit trail** for discount decisions, built at PriceKeel
- **Claude AI agents** automating recurring pricing analysis at Applied Materials

WHY THIS DECK EXISTS

A Pricing Committee does not lack analysis. It lacks a documentation system that survives the handoff to SFDC/CPQ and sales enablement.

What a SaaS pricing function runs into

Pricing decisions get made in committee, but the documentation that is supposed to be the source of truth drifts the moment a change has to cascade into CPQ, the website and sales enablement.

Discounting analysis and packaging optimization work are only useful if a Product Manager can act on structured, direct feedback instead of a vague steer, and if Sales and Deal Desk get a fast, consistent answer on pricing Q&A.

Across SaaS, AI and Contact Center pricing, the hard part is rarely the model. It is keeping governance, systems and committee process in sync as the business moves.

What I have already run, at comparable scale

At **PriceKeel**, I designed a guardrail engine and an audit trail Finance can review for every discount exception, and set up the CRM, CPQ and deal-approval flow it runs against.

At **Sensata**, I ran the Bleeders and Leakers program end to end: discounting analysis on 1,200 opportunities against a $627M target, recovering $700K+ in two quarters and lifting distributor margins 53% to 61%.

At **Applied Materials** now, I build competitive, value-based pricing and automate the recurring parts of that analysis with AI agents built on Claude, keeping documentation current between cycles.

This req asks for Pricing Committee support, documentation as source of truth, discounting analysis and Deal Desk Q&A. That is the exact governance loop above, run on both an industrial book of business and inside a pricing-native startup.

THE REQ, MAPPED

What the Pricing Strategy Manager opening asks for, and where the proof sits.

What the role covers

> *"Prepare PMs to present proposals to the Pricing Committee... maintain pricing documentation as the source of truth and proactively cascade changes to impacted teams and systems."*

> *"Support development and maintenance of pricing analytics and dashboards, including discounting analysis, pricing performance monitoring, and packaging optimization."*

> *"Serve as a resource to Sales and Deal Desk on pricing and packaging Q&A."*

My Proof

Guardrail engine and audit trail at PriceKeel: the documentation-as-source-of-truth problem, solved as the product, with CRM/CPQ and deal approvals set up around it.

Bleeders and Leakers dashboard at Sensata: discounting analysis on 1,200 opportunities against a $627M target, surfacing $433M in margin gaps for leadership to prioritize.

Direct, structured feedback: partnered with senior executives on AP26 revenue models and multimillion-dollar customer quotes, the same clear-communicator seat this req asks for with Product Managers.

Claude AI agents: automate recurring pricing analysis at Applied Materials, the habit that keeps dashboards and documentation current between committee cycles.

THE SENSATA PROOF, IN DEPTH

Bleeders and Leakers: discounting analysis that turned into a number leadership acted on.

Built as a BU-wide Power BI system covering 1,200 pricing opportunities against a $627M target across 3 regions, 4 product families and 20 product lines, with pipeline funnel, win rate and stage distribution by salesperson and product line.

$433M

Margin Gaps Surfaced

The dashboard's job: rank every discounting opportunity into one view instead of chasing anecdotes deal by deal.

$700K+

Margin Recovered in 2 Quarters

Closed through structured negotiations grounded in competitive gaps and documented willingness to pay.

53% to 61%

Distributor Margin Lift

Repricing parts sold through distribution, the packaging-optimization half of the same program.

The same role carried AP26 revenue models and multimillion-dollar customer quotes alongside senior executives. The common thread: every case started from a discounting question and ended in documentation a committee could act on.

FIRST 30 DAYS

What the first month supporting Talkdesk's Pricing Committee looks like.

WEEK 1

Map the documentation flow

Sit with Pricing, Deal Desk and Sales to learn how a Pricing Committee decision currently cascades to SFDC/CPQ, the website and sales enablement, and where that chain already breaks.

Why first: the same move that started the PriceKeel audit trail, map what is missing before building anything new.

WEEK 2-3

Stand up the discounting dashboard

Build the pricing-performance and discounting-analysis view against real deal data, pressure-tested with Deal Desk on 1 to 2 live packaging questions.

Why now: building it against a real question, not in a vacuum, is what made the 53% to 61% distributor gain at Sensata hold.

WEEK 4

Run the first committee prep

Coordinate the next Pricing Committee cycle end to end: prep a PM's proposal, document the decision, and confirm the cascade into CPQ and sales enablement closes the loop.

Why this fast: a Pricing Committee only earns trust once documentation survives the handoff without a follow-up thread.

CLOSE

You are hiring someone to make Pricing Committee decisions stick. I have already built that governance layer, twice.

The core proof is Sensata: **$700K+ recovered in 2 quarters** and a **53% to 61% distributor margin lift**, both run through a discounting-analysis program built from scratch into a $627M-opportunity Power BI dashboard.

What is harder to find is someone who has also built the governance layer as the product: at **PriceKeel**, the guardrail engine and Finance-reviewable audit trail solve the exact documentation-as-source-of-truth problem this req describes, and at Applied Materials today that same discipline runs on Claude AI agents.
