SUMMARY

Product marketer who builds the **technical narrative** for AI systems rather than just writing about one. Founded PriceKeel, a decision-integrity layer for B2B SaaS deal pricing: designed the explainable guardrail engine and the evidence-based audit trail that grounds every recommendation in a company's own closed-won and closed-lost deals, the same grounding and evaluation discipline platform teams expect in technical content. Automates repetitive market and competitive analysis with AI agents built on Claude as Strategic Marketing III at Applied Materials, and shipped an AI job-matching platform (SwipeHire) zero-to-one on the OpenAI API, writing the PRD and scoping the MVP end to end. Built the positioning that turned technical specs into buyer-ready value propositions for engineers and OEM accounts at Sensata, backed by 30+ structured investigative interviews. MS in Marketing Analytics from Simon Business School.

EXPERIENCE

Founder & CEO, PriceKeel

May 2026 - Present

- Designed an **explainable guardrail engine** that recommends a discount guardrail learned from each company's own closed-won and closed-lost deals, a grounding problem close to how an AI agent has to justify its output.
- Built the **audit trail** that records every pricing decision with evidence Finance can review, the same evidence-first narrative a platform team needs before it trusts an agent's recommendation.
- Writes the technical and buyer-facing narrative for the product itself, explaining the guardrail logic to RevOps, Sales leadership and Finance while running pilots and raising the company's first round.

Strategic Marketing III, Applied Materials

Jun 2026 - Present

- Automates repetitive market and competitive analysis with **AI agents built on Claude**, the hands-on agent-orchestration work that backs the technical fluency this role asks for.
- Partners with **Sales, Engineering and Accounts** to size the semiconductor market, turning technical and field input into one narrative before it reaches customers.
- Builds **competitive, value-based pricing** models and forecasts inflection points across multiple product groups while carrying P&L and revenue targets.
