Hiring Team, Captura (Studio Ninja)

Rebuilding Google Merchant Center and Meta catalog feeds to hit 16x ROAS at GenY Medium meant getting structured data and technical SEO right at the feed level, not just the page level. That same discipline, entity mapping, structured formatting, content built for how a machine reads it, is what this role is asking me to extend from search engines to AI answer engines.

The paid-media and agency side maps directly too. At Plug Power I owned \$100K/month in budgets across Google Ads, Microsoft Ads, Meta and LinkedIn, cutting CPA 25% through bid and creative testing, then automated the WordPress and Pardot lead flow to cut cost per lead 50%. At Pixis I ran paid media for 8 client accounts at once, each \$15K-\$90K/month, using Amplitude and Tableau to decide what to scale or cut week over week, the same fast-sprint, agency-coordinated pace this seat runs at.

I also automate my own reporting with Claude agents at Applied Materials, so building AIO content for Claude and ChatGPT as answer engines is a natural extension of a tool I already use daily, not a new platform to learn.

Proof trail at adhi-growth-ai.vercel.app/ref/captura.
