Hiring Team, Secureframe

At Plug Power I ran 15+ A/B tests across paid and landing-page flows, cutting CPA 25% and lifting conversion 20%, then automated the WordPress and Pardot lead flow to cut cost per lead 50%. That lead-handoff speed problem, closing the distance between a qualified visitor and a sales-ready lead, is exactly what your posting asks someone to fix across digital, lifecycle and SDR handoffs.

The enterprise and ABM side is just as direct. At Sensata I shaped multimillion-dollar customer quotes and AP26 revenue models with senior executives, the kind of account-level work an ABM program has to stay aligned with, and I ran 50+ inbound campaigns tied to SEM performance to connect results back to MQL quality and stage 1 pipeline. At Pixis I ran paid media for 8 client accounts at once, deciding weekly what to scale or cut with Amplitude and Tableau.

I also automate my own reporting with Claude agents at Applied Materials and partner directly with Engineering on data-driven forecasting, the same cross-functional test-design muscle a high-pace CRO program runs on.
