Hiring Team, Serval

I already own a P&L with nobody to hand pieces of it to. As founder of PriceKeel I set pricing and packaging, run the CRM, CPQ, forecast and deal approvals myself, and I am running pilots with early customers while raising the first round in parallel. That is the operator range this new business line needs: someone who can set the strategy and then execute the minutiae, because there is no one else in the room.

The pricing and unit-economics instinct is proven at scale too. At Sensata I recovered \$700K+ in margin in two quarters leading the Bleeders and Leakers program, built the dashboard that modeled 1,200 pricing opportunities against a \$627M target, and shaped multimillion-dollar customer quotes directly with senior executives, carrying P&L and revenue targets for a multi-\$100M business the whole time.

I also know what it takes to get a new line to move fast: at Sensata I drove a 100+ feature backlog with Engineering in Agile across 3 regions, cutting time-to-market 20%, the same build-the-playbook-then-execute-it motion an 8-figure first year runs on.
