Hiring Team, Seyfarth Shaw LLP

At Sensata I built the FY2026 Bleeders and Leakers Power BI dashboard: 1,200 pricing scenarios tracked against a \$627M target, with templates and profitability views that let leadership approve or reject a deal on sight instead of rebuilding the math each time. That is the same budget-template discipline your posting asks for across recurring matter types, built once and reused reliably across engagements.

Shepherding approvals is not new work for me either. As founder of PriceKeel I run the company's entire deal-approval process myself, from intake through the audit trail Finance reviews, and at Sensata I recovered \$700K+ in margin in two quarters by evaluating fee and discount structures against competitive gaps and documented willingness-to-pay data, then shaping multimillion-dollar customer quotes directly with senior executives and Finance.

I also trained practice teams on pricing logic in a prior role: at Sensata I ran 30+ interviews with OEMs and distributors to pressure-test quotation approaches before launch, the same stakeholder-training muscle a firm's practice groups need to apply AFA templates consistently.
