Hiring Team, Rubrik

Your posting asks for someone who owns quote-to-cash systems end to end, not someone who just reports on them after the fact. That is PriceKeel: I built the CRM, CPQ and deal-approval workflow myself, including the audit trail Finance can check on demand, and I am running it as a live AI pilot that scores every discount exception against the company's own closed-won and closed-lost precedent. That is the same AI-assisted-quoting muscle your req calls out, built from scratch rather than configured on top of someone else's system.

The dashboard and governance half of the role is where I spent the last year. At Sensata I built the FY2026 Bleeders and Leakers Power BI program: 1,200 pricing opportunities tracked against a $627M target by win rate, dollar-per-win and stage distribution across 3 regions and 20 product lines. That surfaced $433M in margin gaps for leadership to prioritize by salesperson and product line, which fed into a $700K margin recovery in two quarters. I also negotiated multimillion-dollar customer quotes directly and raised distributor and channel-partner margins from 53% to 61%, so I know what a quote looks like on both sides of the governance line.

I have run the people side of this too. At Pixis I hired and managed an 8-person team across 8 client accounts, carrying P&L and revenue targets for each one, which is the same span of ownership a team of business analysts and operations managers needs from its manager.

Rubrik's quoting operating model has to keep pace with a security platform that keeps adding products, bundles and commercial structures, and that packaging-and-governance problem is exactly what I have been solving at PriceKeel and Sensata. Proof trail at adhithyabhaskar.vercel.app/ref/rubrik.
