Hiring Team, Airwallex

Your posting asks for someone who can carry positioning across customers, commercial teams and product strategy at once, in multiple markets at the same time. That is the exact shape of the GTM launch I ran at Sensata: positioning, pricing, channel and launch for a new sensing product line across North America and Europe in one coordinated plan, not three separate ones, which drove $2M+ in first-year revenue. The web copy, the email sequence and the sales deck all said the same thing, because I wrote them from the same positioning brief.

A payments product only earns adoption if sales, pricing and ops are telling customers a consistent story, and that story has to survive a finance buyer's scrutiny. I built that muscle twice: the enablement decks and case studies I wrote for 50+ reps at Sensata lifted win rates 30% by giving every region the same pitch, and as Pricing Lead there I sat across the table from senior executives on multimillion-dollar customer quotes, which is the same conversation a payments buyer's finance team has before they sign off on a new rail or a new fee line.

I do not wait for a launch deck to tell me what customers need. I ran 30+ structured interviews with OEM and distributor customers before writing a word of positioning for Sensata's launch, then built the SQL and GA4 frameworks that showed which regional segments were actually adopting versus which ones just said yes in the room. At Applied Materials today I automate the repetitive side of that analysis with AI agents built on Claude, so more of the week goes to the customer and competitive read and less to the spreadsheet.

What I would bring to the Payments team is a positioning and enablement track record built across regions and sales motions, plus a pricing background that knows what a finance buyer needs to hear before they say yes. Proof trail at adhi-product-ai.vercel.app/ref/airwallex.
