Hiring Team, Handshake

Your posting describes a build-from-scratch seat: set the GTM playbook for a business that is already growing fast. I have built that exact seat before. At Sensata I owned end-to-end GTM, positioning, pricing, channel and launch, for new sensing products with no existing playbook to inherit, and it drove $2M+ in first-year revenue across North America and Europe.

Positioning that lands with enterprises only matters if sales can close with it. I built the battlecards and case studies that armed 50+ reps for live launches at Sensata and lifted win rates 30%, and I ran 30+ customer interviews with OEMs and distributors to keep that positioning grounded in what buyers actually said, not internal assumptions. At Applied Materials I now model revenue scenarios and close multimillion-dollar customer quotes directly with senior executives, the same cross-level influence a Fortune 500 enterprise motion runs on.

I also like the part of this role where there is no perfect brief to start from. I took SwipeHire, an AI job-matching platform, from a blank page: wrote the PRD, ran the competitor teardowns, modeled the pricing tiers and built the GTM analytics stack myself. At Applied Materials I automate recurring competitive and market analysis with AI agents built on Claude, which keeps me comfortable sitting close to a product this technical and moving at the pace Handshake AI's Enterprise business needs.

I would like to bring that build-from-scratch GTM discipline to Handshake AI's Enterprise business. Proof trail at adhi-product-ai.vercel.app/ref/handshake.
