Hiring Team, Pixeldust Technologies

Your posting asks for someone who can turn a vague margin mandate into a feasibility study and a KPI dashboard the leadership team can actually act on. At Sensata I built the Bleeders and Leakers program from nothing: a $433M shortlist of 1,200 pricing opportunities across 3 regions and 20 product lines, prioritized for leadership by salesperson and product line, which I then negotiated into $700K+ recovered in two quarters. No one handed me that dashboard or that shortlist; I built both and ran the negotiations myself.

The stakeholder half of a Founder's Office seat, being the bridge between founders and the people they answer to, is the exact motion I run at PriceKeel, the B2B SaaS deal-pricing company I founded and operate. I built its CRM, CPQ and deal-approval process from scratch, and I am the one preparing the investor updates and board materials our first fundraising round depends on. That means I know what a founder needs in a pitch deck the week before a board meeting, not in theory but because I have built the deck myself under the same deadline.

Cross-functional execution without a clean lane is also not new to me. At Applied Materials I pull Sales, Engineering and Accounts input into one feasibility view and run the OKR cadence and financial models that forecast where the market moves next. At Pixis I hired and managed an 8-person team across 8 client accounts and cut churn 50% by diagnosing the operational bottleneck before anyone else named it. GenY Medium, where I was the liaison across regional, localization and analytics teams, taught me the habit a Founder's Office needs most: carry context across functions so nothing drops in the handoff.

I would want fifteen minutes to walk through how I would spend the first month inside Pixeldust's Founder's Office, built the same way I built Bleeders and Leakers: find the real operational blocker, ship one decision-ready recommendation, then turn it into a cadence. Proof trail at adhithyabhaskar.vercel.app/ref/pixeldust-technologies.
