EXPERIENCE

Founder & CEO, PriceKeel May 2026 - Present

- Founded **PriceKeel**, a decision-integrity layer for B2B SaaS deal pricing that flags a discount exception inside the deal platform before a deal closes, the same deal desk judgment call a signed deal needs before it turns into cash.
- Set up and run the company's **CRM and CPQ configuration**, forecast and pipeline reviews, and **deal approvals** end to end, the same system ownership and approval-matrix design this seat holds for a quote-to-cash stack.
- Built the **audit trail** that gives Finance an explainable record behind every pricing exception, keeping Sales, Finance and Legal aligned on why a non-standard term got approved, the governance discipline a monetization committee's decisions need to stay defensible after the fact.

Strategic Marketing III, Applied Materials Jun 2026 - Present

- Builds **inflection-point forecasting models** for a fast-growing semiconductor market, the same supply-and-demand discipline a usage-based or hybrid pricing model needs to hold up as volume scales.
- Automates repetitive analysis work with **AI agents built on Claude**, the same bias-to-action instinct for cutting manual steps out of a recurring process.
- Carries **P&L and revenue targets** while building forecasting and market-sizing models across multiple product groups, briefing results to leadership the way a deal desk reports cycle time and margin leakage.

Pricing Lead, Sensata Technologies Jul 2025 - May 2026

- Led **global pricing strategy** for the Industrial BU (a multi-$100M business), running the Bleeders and Leakers deal-governance program that reviewed non-standard deal terms against competitive gaps and recovered **$700K+ in margin in 2 quarters**.
- Raised **distributor and channel-partner margins from 53% to 61%** in under 2 quarters by repricing parts sold through distribution, then documenting the new discount logic so it held past the first review.
- Built the **FY2026 Bleeders and Leakers Power BI dashboard**: 1,200 pricing opportunities against a $627M target across 3 regions, 4 product families and 20 product lines, surfacing $433M in margin gaps and tracking stage-by-stage cycle time.
- Ran **AP26 revenue models and multimillion-dollar customer quote negotiations** alongside senior executives, aligning Sales, Finance and Product on deal terms the way a monetization committee aligns pricing, packaging and discounting.
- Drove **+12% YoY revenue and +8% market share** through price realignment informed by competitive benchmarking across 10+ key players.

Product & Growth Marketing, Sensata Technologies Sep 2024 - Jun 2025

- Owned **GTM for new sensing products** across North America and Europe, including pricing and channel structuring, driving $2M+ first-year revenue.
- Ran **30+ customer interviews** with OEMs and distributors to pressure-test willingness to pay and usage-based pricing structures ahead of launch.

Digital Marketing Manager, Plug Power Oct 2022 - Jul 2023

- Presented **marketing budgets of $100K/month** across multiple business units to leadership for approval, building the plans and forecasts behind them.
- Automated the **Mar-Tech stack** (Salesforce, Adobe Analytics, GA, Google Tag Manager) for closed-loop, data-quality reporting.

Customer Success Manager, Pixis (AI Platform) Jul 2021 - Sep 2022

- Carried **P&L and revenue targets** managing an 8-person team across 8 client accounts with per-client budgets of $15K-$90K/month, cutting client churn 50%.
- Delivered **3x ROAS in one month** for a leading fashion brand via full-funnel restructuring, the same fast-turnaround call a deal desk makes without giving up margin.

Senior Digital Marketing Analyst, GenY Medium Jan 2020 - Jun 2021

- Rebuilt **Google Merchant Center and Meta catalog feeds**, delivering 16x ROAS for D2C e-commerce brands.

PROJECTS

SwipeHire

- Modeled **3 subscription pricing tiers** from competitor benchmarks and willingness-to-pay signals for an AI job-matching platform built zero-to-one (Python, OpenAI API, React), the same hybrid-pricing judgment a usage-based model needs at signup.
