Runs discovery straight with those accounts: 30+ structured interviews that lifted CSAT 22%, the same muscle a pod with no dedicated research team needs. Builds and ships with AI by default, from SwipeHire, an AI product built zero-to-one, to the Claude AI agents automating analysis at Applied Materials today. - **Automates repetitive analysis with AI agents built on Claude**, the same AI-as-default-tool habit this kind of pod asks for, freeing time for cross-functional roadmap tradeoffs instead of manual data pulls.
- **Carries P&L and revenue targets** for the role, building leadership decks and running OKRs with weekly and quarterly business reviews.

- **Drove GTM for new sensing products** across North America and Europe, positioning and launch plans that generated $2M+ first-year revenue and lifted conversion 15% on priority launches.
- **Created sales enablement material and case studies** for 50+ reps working the same accounts, improving win rates 30%.
