Hiring Team, Zendesk

At Plug Power I owned a $100K/month budget across multiple business units and automated the WordPress and Pardot lead flow so cost per lead dropped 50% while CPA fell 25%, and I ran 15+ A/B tests to keep tightening it. That is the same job this req is describing: run a multi-channel demand-gen program end to end, from budget and timeline to the lead flow sitting under it, and use the data to keep improving it rather than reporting on it after the fact.

The part of this role built around using AI and data to define high-intent audiences and target them effectively is work I already do. At Applied Materials I build forecasting and market-sizing models that turn field and technical input into one view Sales and Engineering act on, and I automate the repetitive side of that analysis with AI agents built on Claude so more time goes into the targeting decisions themselves. At Sensata I built KPI frameworks in SQL and GA4 across 50,000+ connected devices to find the cohorts that actually convert, which is the same instinct this role needs applied to net-new ICP contacts instead of existing accounts.

I have also sat on the content and research side of a campaign, not just the execution side. At Sensata I wrote the positioning and messaging that turned technical sensing features into a buyer story, ran 30+ customer interviews, and partnered with a 50-rep sales team on the enablement that came out of it, lifting win rates 30%. I ran competitive and market research across EMEA and the US to find where the story needed to change. Your posting asks for someone who can work with content teams on ICP messaging and feed xDR teams a sharper lead-follow-up strategy; that loop between research, messaging and the sales team is exactly where I have spent the most time.

The tools in your posting map closely to what I run today: Salesforce and Pardot for the lead and lifecycle side, Tableau and Power BI for the reporting stakeholders actually read. I would welcome the chance to talk through how the Plug Power and Sensata campaign work maps onto North America demand gen at Zendesk. Proof trail at adhi-growth-ai.vercel.app/ref/zendesk.
