Hiring Team, Panorama Education

Your posting draws a clear line between the standard deal and the one that needs real judgment: discounts, payment terms and multi-year structures that do not fit the template. I built the Power BI dashboard at Sensata that ran exactly that kind of review at scale, 1,200 pricing exceptions against a $627M target across 3 regions, 4 product families and 20 product lines, surfacing $433M in margin gaps and discounting trends so leadership knew which deals to push back on and which to approve. Weighing a non-standard request against commercial policy is work I have already done at that scale, not a skill I would be learning on this req.

The CRM and CPQ side is not new either. I set up and run PriceKeel's own CRM, CPQ and approval matrix, including the audit trail Finance can review for every pricing decision, because the product itself is a deal desk guardrail engine for B2B SaaS pricing exceptions. Before that, at Plug Power I owned the Salesforce-centered Mar-Tech stack end to end for closed-loop reporting. Clean pipeline data and a source of truth for deal requirements are not abstractions to me; they are what let Sales, Legal and Finance trust the same number at the same time, which is the scale problem your lean team is trying to solve.

Being the go-to resource for Sales without becoming the bottleneck is a different skill, and I have built it on the training side: the sales enablement materials I created at Sensata for 50+ reps lifted win rates 30%, and I ran the onboarding conversations that came with them. I also partnered directly with senior executives on AP26 revenue models and multimillion-dollar customer quotes, so the FP&A side of a deal desk conversation is as familiar to me as the Salesforce side, and SaaS metrics like ARR, bookings and recurring revenue are the language I already analyze deals in.

I am Strategic Marketing III at Applied Materials now, where I automate deal and market analysis with AI agents built on Claude rather than rebuilding the same model by hand every cycle, the instinct a Finance-led deal desk looking to scale without slowing the sales process should want. Proof trail at adhi-pricing-ai.vercel.app/ref/panorama-education.
