- Designed the **guardrail engine and audit trail** that gives Finance and Sales leadership one system of record for pricing decisions, replacing legacy CPQ tooling.
- Runs the **CRM, CPQ and deal-approval process** end to end while raising the company's first round, as the sole operator with no one else setting the agenda.

- Turns **scattered field input from Sales, Engineering and Accounts** into one market-sizing view for a fast-growing semiconductor segment, self-directed.
- Builds **forecasting and value-based pricing models** across multiple product groups with no standing template to follow.
- Carries **P&L and revenue targets** and runs the OKR cadence and leadership decks behind weekly and quarterly business reviews.
- Automates repetitive research and reporting work with **AI agents built on Claude**, closing gaps before anyone has to flag them.
