Hiring Team, Handshake

Your posting asks for someone who owns new business reporting end to end: pipeline health, stage conversion, coverage and rep productivity, with one clear definition for every metric. I built that exact system at Sensata: the FY2026 Bleeders and Leakers Power BI dashboard, ranking 1,200 pipeline opportunities against a $627M target across 3 regions and 20 product lines, then surfaced $433M in margin gaps for leadership to prioritize by salesperson and product line. That is the same operating cadence, weekly pipeline reviews, forecast calls, one number everyone trusts, your Revenue Operations Manager seat runs on new business pipeline instead of pricing.

I also run that stack today, not just in a past role. As founder of PriceKeel I own the CRM and CPQ, the forecast and pipeline review cadence, and deal approvals for a live deal-pricing platform, and I built the audit trail Finance can check line by line, the same Salesforce data-quality discipline your posting asks for. At Applied Materials I automate repetitive reporting and deal inspection hands on with AI agents built on Claude, the same automation mandate you describe running with GTM Engineering.

What makes this specific seat interesting is the new business segment split, Mid-Market, Strategic Corporate and Public Sector, each with its own funnel friction and its own fix. I have already run that kind of segment-specific diagnosis: built sales enablement that lifted win rates 30% for 50+ reps at Sensata, and automated a WordPress and Pardot lead flow that cut cost per lead 50% while tying SEM performance to MQL quality and stage 1 pipeline. I like fixing the point where a deal actually stalls, not just reporting that it did.

I would like to bring that operating discipline to Handshake's new business Revenue Operations seat. Proof trail at adhithyabhaskar.vercel.app/ref/handshake.
