Hiring Team, Brain Co.

Your posting asks for someone to own the systems and data behind how Brain Co. sells, from pipeline and forecasting through pricing approvals and the handoff to delivery and billing. That is close to what I run day to day at PriceKeel, a decision-integrity layer I founded for B2B SaaS deal pricing: I own the CRM and CPQ configuration, run the weekly pipeline and forecast review, and operate the deal-approval workflow end to end, with an audit trail Finance can act on for every pricing call.

Before PriceKeel, I built the same muscle at scale inside Sensata's Industrial BU. I built the FY2026 Bleeders and Leakers Power BI dashboard, tracking 1,200 pricing opportunities against a $627M target across 3 regions, 4 product families and 20 product lines by win rate, average dollars per win and stage, surfacing $433M in margin gaps for leadership to prioritize by salesperson and product line. I operated deal review and pricing approvals for that BU and partnered with senior executives on multimillion-dollar customer quotes and contract terms, the same handoff from signed deal to delivery your posting describes.

Brain Co. is scaling deployments across government, insurance, health and financial services, which means pipeline and forecasting data will only get messier as more verticals and general managers feed into one financial plan. I like building the process that keeps that reconcilable: at Sensata I reconciled CRM pipeline data against finance targets to catch pricing gaps before they hit the forecast, and at Applied Materials I now automate the recurring parts of that analysis with Claude AI agents, so the hours a model can do stop eating the time a person needs for judgment calls.

I would welcome a conversation about where the sales process is breaking down for Brain Co. right now and how fast you need the fix. Proof trail at adhithyabhaskar.vercel.app/ref/brain-co.
