SUMMARY

Product manager who runs the **P&L** on a product line, not just the roadmap. Led global pricing and carried revenue targets for Sensata's multi-$100M Industrial BU, recovering $700K+ in margin in two quarters and raising distributor margins from 53% to 61%, while building the multimillion-dollar customer quotes and business cases that won designs with OEM accounts. Ran the sensor product roadmap and a 100+ feature backlog before that, translating OEM and distributor requirements into shipped features across three regions. Now sizes markets and builds forecasting models across multiple product groups at Applied Materials, automating repetitive analysis with Claude AI agents. MS in Marketing Analytics from Simon Business School.
