Hiring Team, Confidential Fintech Lender (via Kwan Ventures)

Working closely with a Founder/CEO on strategic priorities and business performance is not a new assignment for me, it is the job I already hold at my own company. As founder of PriceKeel I run the operating cadence end to end: CRM, CPQ, forecast and pipeline reviews and deal approvals, the same translate-priorities-into-execution-plans work this role asks for at a larger scale.

The ask for management dashboards and business-performance analytics is where I would start. I built the FY2026 Power BI dashboard that gave Sensata leadership a $627M data-driven view of its business, tracking 1,200 pricing opportunities across 3 regions and surfacing $433M in margin gaps for them to prioritize, a cross-functional view spanning business, product and finance stakeholders.

Commercial orientation and unit economics are where the margin-recovery work pays off: I raised distributor and channel-partner margins from 53% to 61% and drove a price realignment that lifted revenue 12% year over year and market share 8%, both real commercial outcomes, not just analysis.

I carry P&L and revenue targets today as Strategic Marketing III at Applied Materials, and I build the leadership decks and OKR cadence that keep a cross-functional team accountable to one number, at every stop since Plug Power.
