Hiring Team, Stampli

Your posting asks for someone who can move from customer insight and product detail to a clear market point of view, then turn that into launches and sales stories. That loop is the Sensata job I actually did: I owned go-to-market for a new line of sensing products across North America and Europe, from positioning and pricing through channel and launch, and it closed its first year at $2M+ in revenue. The muscle you need for Direct Pay, Stampli Card and the ERP ecosystems is the same one, pointed at new ground.

The part of this role built on ERP-specific strategy for SAP, Oracle Fusion and the Microsoft Dynamics suite is a segmentation problem before it is a content problem, and that is where I spend most of my time. At Applied Materials I size markets in partnership with Sales, Engineering and Accounts, turning field and technical input into one point of view the business acts on, and at Sensata I ran 30+ customer interviews with OEMs and distributors to find the buying triggers and objections behind a technical sale. Give me SAP, Oracle Fusion and Dynamics as the segments instead of OEM verticals, and the research method does not change.

Sales and Customer Success enablement is the other half I would bring on day one. I built the talk tracks, decks and case studies that took a 50-rep Sensata team's win rate up 30%, and I kept enterprise case studies and sales materials current at Pixis to support a 20% lift in sales performance. Stampli's ask is talk tracks, discovery guidance, competitive positioning and customer proof for Sales and CS; that is the exact output, not an adjacent one.

I would welcome 20 minutes to walk through how the Sensata launch work and the Applied Materials market-sizing work map onto Direct Pay, Stampli Card and the ERP portfolio. Proof trail at adhi-product-ai.vercel.app/ref/stampli.
