Hiring Team, Impiricus

Your posting asks for someone who owns deal support and quotation strategy on individual transactions, then builds the dynamic, inventory-based pricing model behind them. I've run that exact loop at Sensata: I owned quotation approaches and deal-by-deal review inside the Bleeders and Leakers program, recovering $700K+ in margin in two quarters by tracing each deal back to its prior terms before signing off.

The DealHub piece, owning a CPQ platform end to end rather than just using one, is close to what I already do daily. As founder of PriceKeel, I set up and run the company's own CRM and CPQ configuration, built the pricing-governance audit trail that gives Finance an explainable record behind every discount exception, and run deal approvals and pilots with early customers. It's the same system-ownership work DealHub administration needs: fixing setup issues, training the sales team on it, and keeping the data behind it clean.

The cross-product pricing analysis and KPI dashboards line up too. At Sensata I built the FY2026 Bleeders and Leakers Power BI dashboard, tracking 1,200 pricing opportunities against a $627M target and surfacing $433M in margin gaps across 3 regions, 4 product families and 20 product lines. I also raised distributor and channel-partner margins from 53% to 61% by repricing parts sold through distribution and documenting the new discount logic for governance review, the kind of cross-line reporting a pricing desk running products like Ascend, Pulse and Spark at once would need.

I'd like to bring that discipline to Impiricus. Proof trail at adhi-pricing-ai.vercel.app/ref/impiricus.
