Hiring Team, Learneo

Your posting asks for someone who can take a market from "we think this matters" to a SAM a leadership team can act on. I led a 5-consultant team that did exactly that for Safran: from 170 target facilities down to a SAM of 28 across 10+ competitors and 4 verticals, then presented the market-entry case straight to Safran's leadership. That is the same motion, market mapping into a recommendation someone senior actually signs off on, that this role runs on every week.

I also run the numbers past the point most people stop. At Sensata I built a Power BI dashboard tracking 1,200 pricing opportunities against a \$627M target across 3 regions and 4 product families, surfaced \$433M in margin gaps, and used it to recover \$700K+ in two quarters. Benchmarking 10+ competitors in that same seat helped push our market share up 8 points. I would bring that same rigor to mapping where Course Hero, Quillbot, Symbolab and Scribbr sit against wherever the market is actually moving, not where a deck assumes it is.

Right now at Applied Materials I size the semiconductor market with Sales, Engineering and Accounts, and I automate the repetitive parts of that research with Claude AI agents so more time goes to the judgment calls a model cannot make. Pairing that research discipline with enough financial fluency to make a recommendation stick with senior leadership is what I would bring to Strategy and Market Intelligence at Learneo.

I would welcome the chance to walk through how this maps to your target-sourcing and diligence-support work. Proof trail at adhithyabhaskar.vercel.app/ref/learneo.
