Hiring Team, Skyne Beauty

Building revenue infrastructure for a consumer brand scaling across channels is work I have already done, not something I would be learning on the job. At Pixis I managed an 8-client D2C and retail-media portfolio and cut churn 50% through account strategy and channel diversification, and at GenY Medium I delivered 16x ROAS for D2C e-commerce brands by rebuilding Google Merchant Center and Meta catalog feeds.

Your posting asks for dashboards and BI tools across sales channels, revenue forecasting, and CRM integration, close to the exact mix I run today. I built Sensata's FY2026 Power BI pipeline dashboard, 1,200 opportunities against a $627M target, and I set up and run PriceKeel's own CRM, CPQ, forecast and pipeline reviews from scratch as its founder, so I know what it takes to stand up reporting infrastructure a small team can actually trust.

I like that this role sits close to the founder: I have run an 8-person team end to end at Pixis and built the GTM and analytics stack solo for my own company, so working lean with direct visibility into leadership decisions is the environment I do my best work in, not a step down from somewhere bigger.
