PITCH DECK | INSTACART DEAL DESK SPECIALIST

Your five first-year pillars, velocity, risk, Quote-to-Cash, cross-functional trust and scale, are one job I have already done end to end, for a multi-$100M business and for my own company.

Contract-risk judgment, CPQ system ownership and a Finance-auditable trail from someone who has built the audit trail himself, not just filed the quote for someone else to check.

- **$700K+** margin recovered in 2 quarters via quote-by-quote risk review at Sensata
- **53% to 61%** distributor margin lift from repriced, risk-reviewed contract terms
- **CRM + CPQ** and deal-approval workflow owned end to end, founder of PriceKeel
- **1,200 opportunities** tracked against a $627M target across 3 regions, 4 product families, 20 lines
- **Claude AI agents** automating recurring pricing analysis at Applied Materials

WHY THIS DECK EXISTS

Your posting is explicit: deals are getting more complex faster than the process behind them, and Sales, Finance, Tax and Legal all need to trust the same number.

Where that trust breaks

A slow deal desk does not announce itself. It shows up as a quote stuck in approval while a rep waits, a contract clause nobody flagged until after signature, and a Quote-to-Cash process that worked fine until a new pricing model or acquisition landed on it.

Because Sales, Finance, Tax and Legal all touch the same deal, one missed review step becomes everyone's cleanup problem at close, not just Deal Desk's problem alone.

The fix is not a longer approval queue. It is one person treating deal review, system ownership and the audit trail as a single loop instead of three separate handoffs.

What I already run

At **PriceKeel**, I configured and personally run the CRM, CPQ, forecast and pipeline reviews, and deal approvals, the same Quote-to-Cash ownership this role holds for Instacart's Sales org.

At **Sensata**, I read multimillion-dollar customer quotes and AP26 revenue models for risk and approved terms before signature, then scaled that same discipline into a program covering 1,200 pricing opportunities.

Both sides mean I have sat in the deal-review seat and the system-ownership seat on the same approval, not just one of the two.

Deal velocity, risk and compliance, Quote-to-Cash excellence, cross-functional partnership, scalable new programs: that is one connected loop. Review the deal, run the system, keep the trail honest.

THE REQ, MAPPED

What the Deal Desk Specialist opening asks for, next to where the proof already sits.

What the role covers

Deal Velocity: pricing, discounting and structure get reviewed and approved quickly and correctly, so Sales spends time selling, not chasing approvals.

Risk and Compliance: contract risks are caught before signature, and every deal aligns with ASC 606 and approval policy.

Quote-to-Cash Excellence: the Salesforce/CPQ process runs cleanly end to end, documented and consistent.

Cross-Functional Partnership and Scalable New Programs: Sales, Finance, Tax and Legal share one playbook as new products and pricing models roll out.

My Proof

Deal velocity: owned quote-by-quote review inside the Bleeders and Leakers program at Sensata, recovering $700K+ in margin in 2 quarters without slowing a single approval.

Risk and compliance: read multimillion-dollar customer quotes and AP26 revenue models for risk, and built the PriceKeel audit trail that gives Finance an explainable record behind every pricing call.

Quote-to-Cash excellence: configured and personally run PriceKeel's own CRM and CPQ, forecast and pipeline reviews, and deal approvals end to end.

Cross-functional partnership and scale: partnered with senior executives, Sales and Engineering at Sensata and Applied Materials, scaling Bleeders and Leakers into a dashboard covering 3 regions, 4 product families and 20 product lines.

THE PROOF, IN DEPTH

Bleeders and Leakers: a quote review fast enough for Sales, auditable enough for Finance.

Built as a BU-wide Power BI system covering 1,200 pricing opportunities against a $627M target across 3 regions, 4 product families and 20 product lines, with every gap traced back to a specific deal record before leadership set the next quarter's targets.

$700K+

Margin Recovered, 2 Quarters

Quote-by-quote risk review against competitive gaps and each account's own deal history, the same review this role runs on every transaction that crosses the desk.

53% to 61%

Distributor Margin Lift

Repriced the channel logic and documented the new terms for governance review, so the discount limits held past the first quarter they were set.

$433M

Margin Gaps Surfaced

Every gap traced to a specific deal by salesperson and product line, the same auditable detail a Quote-to-Cash process needs end to end.

PriceKeel turned that same instinct into an operating model: I run the CRM, CPQ and the audit trail myself, so the deal and the governance record are never two different stories told to two different people.

FIRST 30 DAYS

What the first month owning Deal Desk at Instacart looks like.

WEEK 1

Map the Quote-to-Cash flow and approval policy

Sit with Sales, Finance, Tax and Legal to walk the live SFDC/CPQ setup, the discount-approval policy and ASC 606 checkpoints, and shadow one deal end to end from quote to booked revenue.

Why first: the same instinct that had me learn PriceKeel's own CRM and CPQ configuration before building anything on top of it.

WEEK 2-3

Own a live deal-review and risk-flagging cycle

Take ownership of a live batch of deals end to end: review pricing and discount structure for approval, read each contract for risk, and flag anything that needs Legal or Tax before it reaches signature.

Why now: the same contract-risk discipline that let me approve multimillion-dollar customer quotes at Sensata without a surprise after signature.

WEEK 4

Write the playbook for one new program

Pick one scalable new program, a pricing model or product line, and document the approval playbook and CPQ setup it needs before volume arrives, then walk the Sales team through when to engage Deal Desk.

Why this fast: a shared playbook only earns its keep if it is written down before the volume hits, not scrambled together after.

CLOSE

You are hiring someone to keep deal velocity, risk review and Quote-to-Cash honest across every deal. I have already built that discipline, from both sides of the desk.

The core proof is Sensata: a Power BI system tracking **1,200 pricing opportunities against a $627M target**, distributor margins lifted **from 53% to 61%**, and $700K+ in margin recovered in 2 quarters through quote-by-quote risk review.

What is harder to find is someone who has also spent the last several months owning the CRM, CPQ configuration, deal approvals and audit trail for his own company's deal flow. **I built that at PriceKeel**, so the Quote-to-Cash ownership and governance discipline this role runs is not something I would need to pick up on the job.
