Hiring Team, LinkedIn

Your posting asks for someone who can turn member insight directly into the product roadmap and the launch message. I already run that loop: 30+ customer interviews with OEMs and distributors at Sensata became both a roadmap decision and the positioning that lifted conversion 15% on the next launch, and the KPI framework I built in SQL and GA4 across 50,000+ connected devices showed which of those changes actually moved the metrics that mattered.

I like that this role treats research, messaging and experimentation as one job instead of three. At Plug Power I ran 15+ A/B tests across Paid Search and Paid Social and cut CPA 25%, then used customer research to push conversion up another 20%. At Pixis, an AI ad platform, I read Amplitude and Tableau data on consumer behavior across 30+ campaigns to lift ROAS 40%, and rebuilt one fashion brand's funnel for 3x ROAS in a single month, the same read-the-data-then-launch work a billion-member consumer product runs on every day.

I currently build value-based pricing and market models as Strategic Marketing III at Applied Materials, where I automate the repetitive side of that analysis with Claude AI agents so more time goes to the judgment calls, the same translate-technical-into-a-narrative work this role does when it explains product updates to LinkedIn's members.

I would like to bring that insight-to-launch discipline to LinkedIn's consumer marketing team. Proof trail at adhi-product-ai.vercel.app/ref/linkedin.
