Hiring Team, Workday

Your Field Pricing Strategy team gives account executives tier-2 deal support during negotiation, and that is exactly where I spent the last year. At Sensata, I led the Bleeders and Leakers program, advising deal-specific pricing strategy on live negotiation cycles and recovering $700K+ in margin in two quarters while raising distributor and channel-partner margins from 53% to 61%. The mechanic is the same one your posting describes: sit inside the deal while it is still moving, not after it closes.

The posting also asks for commercial-performance trend analysis that gets turned into a proposal for leadership's next move. I built the FY2026 Bleeders and Leakers Power BI dashboard, tracking 1,200 pricing opportunities against a $627M target across 3 regions, 4 product families and 20 product lines, and surfaced $433M in margin gaps so leadership could prioritize by salesperson and product line. I built a second Power BI model on top of that one, flagging line items where a price change could lift profitability more than 50%, the same data-model-to-recommendation work your posting is hiring for.

On enablement: I built the sales-facing decks and case studies that 50+ Sensata reps carried into a product launch, lifting win rates 30%. On AI pricing models and concepts: I automate recurring pricing analysis with Claude AI agents as Strategic Marketing III at Applied Materials, and I founded PriceKeel, a decision-integrity layer that reads a live discount exception inside a deal platform and recommends an explainable guardrail learned from a company's own closed-won and closed-lost deals. Running PriceKeel also means I configure the CRM, CPQ and deal-approval workflow behind quote-to-cash myself, not just read about it in a handoff doc, which is the same quoting-system and Order Form territory your posting names.

Happy to walk through the Bleeders and Leakers build or the PriceKeel guardrail logic whenever it is useful. Proof trail at adhi-pricing-ai.vercel.app/ref/workday.
