Hiring Team, Rubrik

Your posting asks for someone who can drive customer loyalty and cut churn by reading the signals before a renewal is in jeopardy, not after. At Pixis I cut client churn 50% through proactive account strategy, channel diversification and vertical playbooks, running that program across an 8-client, $15K-$90K/month-per-client portfolio I managed end to end. That is the same re-engagement-before-the-renewal pattern this role is meant to scale from fast-growing SMBs to Fortune 500 accounts.

The monetization and financial-modeling half of the role is where I spent the last year. At Sensata I built the FY2026 Bleeders and Leakers Power BI program, tracking 1,200 pricing opportunities against a $627M target across 3 regions and 20 product lines, which surfaced $433M in margin gaps for leadership to prioritize and fed into $700K+ in margin recovered in two quarters. I also raised distributor and channel-partner margins from 53% to 61%, which only works when a financial model gets translated into something a sales or renewals team can actually act on, the same translation your posting needs between Product, Analytics, Support and Sales.

I have built the playbooks, not just the analysis behind them. At Pixis I hired and managed an 8-person team, carried P&L and revenue targets for every account, and fed voice-of-customer insights straight to product, the same loop this role needs running between Customer Success and the roadmap. PriceKeel, the company I am building now, takes that instinct further: a guardrail engine that scores every pricing exception against a company's own closed-won and closed-lost deals, sold directly to RevOps, Sales leadership and Finance.

Rubrik's retention motion spans SMB through Fortune 500, and that range is exactly where a single playbook stops working and a data-driven, segment-aware one has to take over. That is the churn problem I solved at Pixis and the monetization problem I have been solving at Sensata and now at PriceKeel. Proof trail at adhi-pricing-ai.vercel.app/ref/rubrik.
