Hiring Team, Ivo

Your posting asks whoever takes this seat to scale a win-loss process and keep the competitive view sharp enough that a rep trusts it mid-call, and that is close to work I already did at Sensata. I built the competitive benchmarking behind a price-realignment call across 10+ rival suppliers, which drove +12% YoY revenue and +8% market share, the same habit of reading what a competitor does next and turning it into something Sales can use before the call, not after.

The other half of the role, giving reps and CSMs the context, messaging and talk tracks for something new, is the GTM enablement I ran on a full product launch. I owned positioning end to end for a new sensing line, turning technical specs into customer value and lifting conversion 15%, then built the decks and case studies 50+ reps used to sell it, which moved win rates 30%. On that same launch I ran 30+ interviews with OEMs and distributors and fed what I heard straight back into the roadmap, not a deck nobody reread, raising CSAT 22%.

The "do what it takes" line in your posting is not one I am reading for the first time. I am founder and CEO of PriceKeel, a decision-integrity layer for B2B SaaS deal pricing that reads a live discount exception and recommends a guardrail learned from a company's own closed-won and closed-lost deals, the same pattern a win-loss process runs on, pointed at pricing instead of a sales deck. I am also Strategic Marketing III at Applied Materials today, building competitive pricing views and automating the repetitive side of that analysis with Claude AI agents, so the strategic work gets more of my time, not less.

Ivo is expanding from legal into procurement while shipping every week, which means the positioning and battlecards you have now will not be the ones you need in six months. I would rather build that moving target than describe a finished one. Proof trail at adhi-product-ai.vercel.app/ref/ivo if you want the launch and enablement work firsthand.
