Hiring Team, BD

Your posting asks for someone who runs integrated demand-generation campaigns, manages third-party media, and coordinates the Google Ads account with agencies. That is the job I ran at Plug Power: I owned Paid Search and Paid Social across Google Ads, Microsoft Ads, Meta and LinkedIn on a $100K/month budget spanning multiple business units, coordinated agency-side bid optimization and A/B testing, and cut CPA 25%.

The tracking and reporting half of your role is where I spend most of my time. I closed the loop on campaign tracking by automating the Mar-Tech stack (Salesforce, Adobe Analytics, GA, Google Tag Manager) at Plug Power, and at Sensata I built the SQL and GA4 KPI frameworks behind a launch campaign that drove +35% qualified leads. Both jobs needed the same thing your Regional Marketing team needs: clean UTM-level data that turns into a performance report someone can act on, not just a dashboard.

Omnichannel execution across a client roster is where Pixis comes in: I managed third-party retail media (Amazon Ads, Criteo) and iOS app UA (Appsflyer, Adjust) for an 8-client, $15K-$90K/month portfolio, and used Amplitude and Tableau to lift campaign ROAS 40% across 30+ live campaigns at once. That is the same muscle a single Regional Marketing team needs when it is running omnichannel campaigns across multiple agencies and platforms at the same time.
