Hiring Team, PointClickCare

Your posting asks a Senior Monetization Strategy and Pricing Manager to run AI tools through pricing models, scenario and margin analysis, and KPI tracking in nearly every section. At Applied Materials I already run that loop: I built the competitive, value-based pricing and forecasting models for a fast-moving equipment market, then automated the recurring analysis behind them with AI agents built on Claude so the time goes to the actual pricing call instead of the spreadsheet. That is the exact shape of the role you are describing, not an adjacent skill I would need to pick up.

Before that, at Sensata, I led the Bleeders and Leakers program: a Power BI system that monitored win rate, avg $/win, stage distribution and margin impact across 1,200 pricing opportunities ranked against a $627M target, then turned those metrics into $700K+ of margin recovered in two quarters through negotiations built on competitive gaps and customer willingness to pay. The same program raised distributor and channel-partner margins from 53% to 61%, work that only held because Sales and Finance signed off on the model together, the cross-functional pattern your posting calls out across Product, Marketing, Sales, RevOps and Finance.

I have also sat on the new-product side of monetization: at Sensata's Product and Growth Marketing team, I owned the GTM and pricing strategy for new sensing products across North America and Europe, running 30+ customer interviews with OEMs and distributors to test willingness to pay and packaging preferences before launch rather than after. Monetizing a new product offering and feeding market research into pricing recommendations, the exact ask in your Position Summary, is work I have already shipped twice: once from the strategy seat, once from the GTM seat.

What I would add beyond the resume is PriceKeel, the decision-integrity layer for B2B SaaS deal pricing I am building now. It reads a live discount exception, recommends an explainable guardrail, and gives Finance an audit trail for the call, which means I spend my own time thinking about the exact discounting-framework and complex-deal-support problem your Director's team owns for PointClickCare's provider customers. I would like to bring that same pricing discipline to a platform with 30,000 provider organizations and a 400+ partner Marketplace already depending on getting packaging right.
