SUMMARY

Marketplace operator who shipped a two-sided staffing and job-matching platform zero-to-one, balancing worker supply against employer demand. SwipeHire (Python, OpenAI API, React) onboarded 50+ users and lifted activation 25% through 8+ A/B tests and 12+ interviews, the same supply-demand discipline marketplace health depends on. At Sensata I owned the product roadmap and a 100+ feature backlog for enterprise manufacturing customers running multi-stakeholder rollouts across 3 regions and operational workflows, cutting time-to-market 20% and accelerating releases 25%. I build the internal operational tooling that scales those outcomes, Power BI systems that turned a \$627M pricing target into a prioritized pipeline, and I am an AI-native operator: Strategic Marketing III at Applied Materials today, running Claude AI agents to automate analysis I used to do by hand.
