Hiring Team, Console

Selling AI-agent productivity to a sophisticated enterprise buyer is one specific kind of growth motion. The buyer has been pitched ten Moveworks alternatives this quarter, has a ServiceNow contract they cannot rip out, and reads "AI" as buzzword by default. The marketers who land that buyer are not the ones running brand awareness; they are the ones writing the comparison page that already addresses what their CIO will object to in the procurement review, the ones whose paid-search copy speaks in tickets-resolved-per-seat instead of slogans, and the ones whose lifecycle nurture moves a Slack-installed free user to a paid contract because the Playbook ROI is provably real.

I have run the analog of that motion at Pixis. Eight-client B2B SaaS portfolio, per-client monthly media budgets ranging \$15K to \$90K, eight-person team across creative, account management, and platform specialists. I trained eight enterprise marketers on AI bidding tools as part of weekly client QBRs to CFOs and growth leads. The translation work, AI methodology to enterprise outcome, is structurally the same translation Console does for IT teams.

On the demand-engine side, I rebuilt Plug Power end-to-end on the stack Console likely runs: paid on Google, Meta, LinkedIn, and programmatic with -25% CPA and +20% conversion, plus closed-loop attribution rebuilt across HubSpot, Salesforce, Adobe Analytics, GA4, and GTM. UTM spec from scratch. GTM containers rebuilt. Lead routing validated through Salesforce campaign attribution before any cohort number got presented. Plus a 4-vendor MarTech RFP coordinating six internal stakeholders.

On SEO and inbound, the AEO and GEO program at Plug Power is directly relevant to Console's competitive surface. On-page and technical SEO, schema, content-cluster mapping, FAQ pages structured for ChatGPT, Claude, and Perplexity citation. Comparison-page content for "Moveworks alternative" or "Freshservice replacement" searches is exactly the muscle, just on a different category.

On the AI-native side, SwipeHire shipped solo on Python, OpenAI API, and React. Four Anthropic Claude certifications come from running prompt-based iteration as my actual workflow. AI for marketing is not a 2026 bolt-on for me; it is the operating system one product was built on.

SF works. Boston-based today, open to relocating. Resume attached.
