Hiring Team, GlossGenius

I'll be honest about one thing upfront: the JD asks for 7+ years. I have 4+. Here's why I think the work matters more than the count.

At Pixis, I didn't just analyze campaigns -- I led the analytics function. 8-person team, \$1.4M in budgets, attribution standards I built from nothing. When a leading Indian beauty brand's ROAS was flat, I didn't hand someone a dashboard and wait. I restructured the attribution model, identified which channels were getting false credit, reallocated spend based on actual lift, and delivered 3x ROAS in one month. That's not a 4-year analyst's output. That's the output of someone who's had to own the number, not just report it.

The AI piece is real, not performative. I hold four Anthropic certifications (Claude 101, Claude Code 101, Cowork, Building with Claude API) and I built a Python-based analytics tool using Claude's API in Cursor -- live data ingestion, rule-based scoring, AI reasoning layer, interactive dashboard. When your JD says "demonstrated AI tool usage (Claude, ChatGPT, Cursor)," I'm not checking a box. I'm certified and I've shipped with those tools.

At Plug Power, I built multi-touch attribution from scratch -- Salesforce, Adobe Analytics, GA, GTM wired into a single model that could finally tell us what was working. At GenY, I built the SQL dashboards that defined CAC and ROAS at the channel level and became the basis for every budget decision. In both cases, I was the person who defined the metrics, not the person who inherited them.

GlossGenius is a beauty vertical SaaS company, and that matters to me specifically: the Pixis beauty brand work taught me that beauty/wellness funnels have their own physics. The attribution models that work for B2B SaaS need to be rethought for a customer who discovers your product on Instagram, visits three times, and converts after a friend's recommendation. I've seen that funnel up close and I know how to measure it.

I'd welcome the chance to show that the depth of work speaks louder than the years on the resume.
