Hiring Team, Hewlett Packard Enterprise

I want to be straight with you on the eight-year line in your JD. I have four-plus years by the calendar. The reason I am still applying is that Sensata gave me Expert-scope problems early, and I want you to weigh the scope alongside the tenure.

Here is the scope. At Sensata I own a \$627M pricing opportunity across three regions, four product families, and twenty product lines. I built the Power BI dashboards leadership reads weekly, ran the 1,200-opportunity pipeline funnel, and presented the revenue narrative to senior executives. On the launch side, I drove \$2M+ first-year revenue on a new sensing-product GTM across NA and EU: positioning rewrite (30+ OEM and distributor interviews), distributor-branded battlecards and FAQs for 50+ reps, paid plus email plus event support, +30% sales-rep win rate. Competitive analysis on 10+ players, market share up 8%. That is portfolio-scale PMM. The years line says four; the work line says senior.

I have also shipped an AI product end-to-end. SwipeHire is an AI job-matching platform I built solo on Python, OpenAI API, and React. ICP, positioning, GA4 and event tracking from day one, eight A/B tests on activation flows. 50+ users, +25% activation. The HPE Private Cloud portfolio sits at the AI infrastructure intersection, and I have been on both sides of that conversation: as a marketer translating AI capabilities into outcomes (Pixis trained eight enterprise marketers on AI bidding) and as the engineer shipping the AI product (SwipeHire).

What I do not have yet is deep HPE GreenLake or hybrid-cloud-landscape fluency. The vocabulary is week-one ramp. The PMM craft, GTM plans, positioning, executive narratives, sales enablement at portfolio scale, is what I already do.

One honest ask. If the years gap is firm and you have flex on the companion req (Private Cloud AI, 1205895), I am open to that role too. Same hiring manager scope, slightly different focus. Either way I want to be in the conversation.

Boston-based, open to relocating to Spring with a hybrid conversation. Happy to walk through any of the above in more detail.
