Hiring Team, JPMorgan Chase

Channel Strategy and Optimization is the part of digital marketing where the work actually compounds. Every test you ship cheapens the next one. The reason that compounding ever stops is almost never the creative or the buyer; it is that the measurement framework was not built well enough to support the next experiment in the queue. Owned channel programs that lose their edge are usually programs that lost their measurement plumbing first.

I have rebuilt that plumbing at Plug Power. UTM spec from scratch, GTM containers rebuilt, lead routing validated through Salesforce campaign attribution, the full click-to-SQL chain finally one number rather than three. CPA dropped 25%, conversion went up 20%, and the team could run experiments faster than we could buy traffic. The Adobe Audience Manager segmentation and suppression-list work paired with that. Net-new leads are decided at the bottom of the funnel, not the top, and we rewrote the suppression rules to actually reflect that.

On owned channel scale, I have run an 8-client B2B SaaS portfolio at Pixis on a \$1.4M budget with weekly multi-channel optimization across Google, Meta, programmatic display, and email. Per-client playbooks tied to renewal criteria. Documented SLAs. Two channels replaced mid-quarter when KPIs slipped. Churn down 50%. Multi-tasking at portfolio scale is documentation, not heroics, and I have the playbook discipline that lets it work.

On consumer marketing specifically, GenY is my closest analog. I rebuilt a D2C e-commerce paid stack to 16x ROAS by fixing the Shopping feed, schema, and category-page on-page SEO that nobody had touched in a year. Technical SEO is the tax content SEO pays to work, and I have paid it on every site I have touched, including SwipeHire, where I shipped a full website (CMS, LPs, GA4 plus GTM event tracking, eight A/B tests, +25% activation) end-to-end.

What I do not have yet is consumer banking tenure. Plug Power, Pixis, and Sensata are B2B; GenY is D2C. The execution craft for owned channel optimization, segmentation, A/B testing, and measurement framework is the same regardless of buyer. The customer changes; the rigor does not. JPMC scale and the consumer book are the part I have not done yet, and the part I want to do next.

Boston-based, open to relocating to Columbus with a hybrid conversation. Happy to walk through any of the above in more detail.
