Hiring Team, OpenAI

ChatGPT Ads is the rare advertising product where the buyer arrives mid-intent and the surface itself can answer the question. The PMM problem is not how to buy more impressions; it is how to convince an enterprise marketer that an answer engine deserves a line item in their media plan, and to give Sales the artifacts that turn that conviction into a closed deal. That is the part of the work I want to do.

I have done two things very few PMM candidates have done together. I shipped an AI product end-to-end. SwipeHire is an AI job-matching platform I built solo on Python, OpenAI API, and React. ICP definition, competitive teardown, visa-aware positioning, GA4 plus event tracking from day one, eight A/B tests on activation flows. 50+ users, +25% activation. I know what AI product marketing looks like when the AI is the actual product, not a feature bullet. And I have done PMM-adjacent work for an AI marketing platform at Pixis, where I trained eight enterprise marketers on AI bidding and creative tools across a \$1.4M, 8-client B2B SaaS portfolio. The job there was to translate AI capabilities into outcomes the client could explain to their CFO. Same translation muscle ChatGPT Ads needs for the enterprise IT and CMO buyer.

On the GTM-at-scale side, I own positioning, messaging, and launch at Sensata: \$2M+ first-year revenue across NA and EU, 30+ OEM and distributor interviews informing the positioning rewrite, sales enablement (decks, case studies, battlecards, FAQs) for 50+ reps, +30% sales-rep win rate, +8% market share. The lesson I took: engineers and budget-holding buyers want outcomes, not specs. The deck has three specs slides max; everything else is outcome and proof. That is how I would frame ChatGPT Ads to advertisers in week one.

On market assessment, my Simon consulting capstone for Safran sized TAM and SAM across 170 facilities, built personas across four verticals (aerospace, defense, healthcare, research), and shipped positioning for three B2B product lines to Safran leadership. That is the customer-discovery muscle this role is hiring for, applied at a different scale.

SF or NYC are both workable for me; happy to walk through any of the above in more detail.
