Hiring Team, AWS,

Edge networking sits at the intersection of two things I do every day: translating technical infrastructure into language a buying committee will actually act on, and building the launch assets that move a deal from interest to signature. At Sensata, I own positioning, GTM, and pricing for industrial sensing products sold to OEM and distributor buyers who care about latency, footprint, and total cost - the same technical buyer profile that evaluates AWS edge services. I want to bring that work to the AWS Global Infrastructure portfolio.

Direct evidence of fit:

- **Sales enablement library used by 50+ reps, +30% win rates:** Built the launch deck, battlecards, demo scripts, and distributor playbooks for new Sensata product lines across NA and EU. Drove **\$2M+ first-year revenue** on positioning, channel strategy, and field enablement.
- **Technical buyer translation:** Ran **30+ structured discovery interviews** with industrial OEMs and distributors; translated engineering specs into buyer narratives that lifted **CSAT +22%** and **feature adoption +18% across 50K+ devices**. Same shape as enterprise architects evaluating edge networking.
- **4-vendor MarTech RFP and rollout at Plug Power:** Aligned 6 cross-functional stakeholders across Marketing, Sales, IT, and Procurement; rebuilt the stack on **HubSpot + Salesforce + Adobe + GA4 + GTM**. **-25% CPA, +20% conversion**, closed-loop attribution from ad click to SQL.
- **Generative AI fluency, shipped not theoretical:** Built **SwipeHire** solo on **Python + AI APIs + React** - 50+ users, GA4 + GTM + Amplitude instrumentation, 8+ A/B tests. I can author reference architectures and AI use-case content because I have shipped the product.
- **Portfolio-level strategy under pressure:** At Sensata I drive **+12% YoY revenue** and **+8% market share** across 3 regions, 4 product families, and 20 product lines; present pricing and positioning recommendations to senior executives weekly.

On qualifications: MS in Marketing Analytics from **Simon Business School (U. of Rochester)**, BE in Mechanical Engineering from **BITS Pilani**, and a working engineering background that makes reference-architecture and technical-evangelism content natural. Open to relocating to Seattle.

Looking forward to talking.
